

# Modular ATP training

*Modular ATPL training is an individual training offer. This offer is personalized and is specially tailored for individuals already having a private pilot rating.*

## Training objectives

Once the training is finished, several working opportunities are available. For example one will be able to apply for an airline as first officer, join business jet company or an airwork operator...

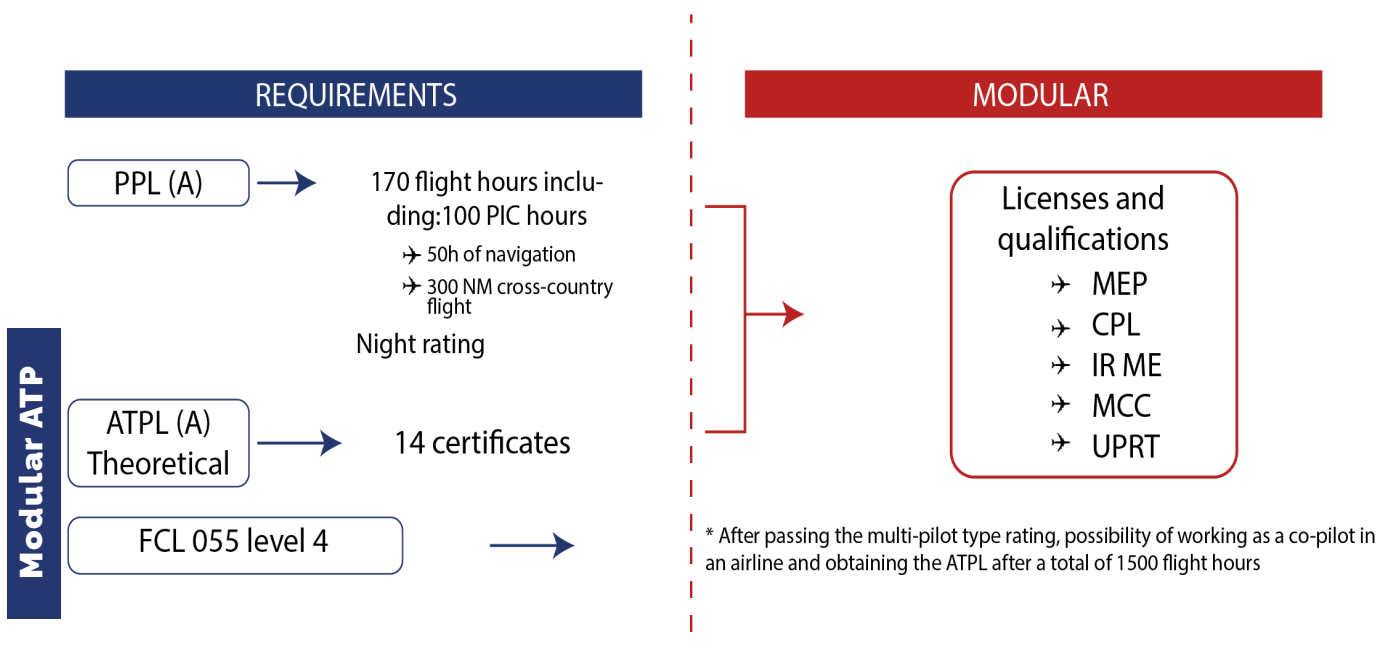

- Students choosing this training path would also be able to undertake UPRT\* (upset prevention recovery training) and MCC APS\* (multi crew coordination). They could also, if they desired so, follow the FCL 055 training to gain OACI English Proficiency Level 5 or 6 in order to maximize their career opportunities\*.

## Training syllabus

- Multi engine piston rating (MEP)
- Commercial pilot license with IR rating (CPL/IR)

- Optional FCL 055 course for students wishing to obtain a level 5 or 6 and maximize their chances of joining a company.

*\*Optional*

# Requirements

Applicants shall already have:

- Class 1 medical
- Theoretical ATPL
- OACI English Proficiency Level 4
- Private pilot licence with 170 flight hours including:
  - > 100 PIC hours
